

Phase 8: Project Demonstration

AI Brand Voice & Marketing Content Generator

1. Demonstration Context & Objectives

This demonstration walks through a real-world product campaign launch. It illustrates the system's ability to learn a sophisticated corporate brand identity, synthesize high-quality copy, and process iterative user revisions directly on the Streamlit dashboard.

2. Walkthrough Scenario: Nike 'Shoes AirGlow' Launch

Step 1: Input Setup inside Control Sidebar:

- *Brand Name:* Nike
- *Campaign Purpose / Topic:* Launching new Shoes AirGlow
- *Brand Voice Samples:* simple but stylish
- *Selected Content Type:* Ad Headline

Step 2: Generation Response:

Upon clicking 'Generate Content', the logical backend queries the Gemini 2.0 Flash engine. The AI interprets the 'simple but stylish' sample copy, analyzes the Nike context, and outputs the following headline on the canvas:

Nike AirGlow: Experience the Glow, Unleash Your Go.

3. Iterative Feedback & Refinement Loop

Step 3: Direct Feedback Input:

The marketer decides to change direction, preferring a longer, more playful social media post with emojis and hashtags. The user updates 'Content Type' to Social Media Post and types the following in the Feedback Box:

"Make it more playful, add more emojis, shorten paragraphs"

Step 4: Refined Output Generation:

The system aggregates the feedback instructions and the original output, invoking the refinement engine. It outputs a perfectly brand-aligned social post, completely caching the interaction in SQLite:

■ Ready to ignite your run? ■

The new Nike AirGlow is here, engineered for unparalleled speed and comfort. Imagine floating effortlessly with each stride, feeling the responsive cushioning propel you forward. These aren't just shoes; they're your personal bests, pushing your limits!

Shop the new collection now and experience the future of running! ■

#NikeAirGlow #RunFaster #JustDoIt #NewRelease #RunningShoes #FitnessGear

Demonstration Result: The refinement output is immediately rendered on the screen. The copy is 100% direct marketing text with zero conversational filler. Clicking 'Copy to Clipboard' copies the text, displaying 'Text copied to clipboard!' on the web interface.
